-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-17 are objected to because of the following informalities: The word 'colour' should be changed to --color-- in order to comply with U.S. recognized spelling. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alexander (U.S. 6,319,174) in view of Jones (U.S. 6,155,495). Alexander teaches a trampoline comprising a flexible mat (2) and a plurality of resiliently flexible rods each having a lower end retained in a frame of the trampoline and an upper end coupled to the periphery of the flexible mat. Alexander fails to specifically teach a region of contrasting color located near the edge, however, Jones teaches the desirability of using contrasting colors in trampolines in order to distinguish certain areas, including the frame edges from the mat. In view of the teachings of Jones it would have been obvious to one of ordinary skill in the art at the time of invention to provide the peripheral edge of the trampoline with a contrasting color in order to help distinguish the edges from the main mat portion for a user jumping on the mat. Specific limitations

drawn to colors, shading, and designs, and materials of the region of contrasting color are considered simple design considerations well within the levels of those with ordinary skill in the art absent unexpected or undesired results.
